# Hi!

Welcome back!

# Feedback

I'd love your feedback. If you don't feel comfortable/ don't have time to tell me in class for whatever reason, please feel free to submit any feedback anonymously to:

# So, Statistics!

Gapminder

# Activity: Present a story.

Objective: To learn about different useful ways to represent data in graphs.

# Activity: Present a story.

- Form small groups (2-3 students).
- Pick a **graph type** out of the cup for your group.

# Activity: Present a story.

Gapminder Website: https://www.gapminder.org/tools/

- By playing with gapminder, figure out:
  - what is represented in your **graph type**, and how.
  - What key things can you change, and which you are interested in.
- Find something interesting in your graph to tell a story about, research the appropriate time period/countries to identify important events.

On Friday, your group will present your story to the class. You can use PPT or simply a live demonstration. You will present your story to half the class.
